Subject: 2010 Brownfield's report documents/DOE docs for Wolff Alport site
Attachments: FINAL FWACC Rad Scoping Survey 9-8-2010.pdf; NYCDOHMH fact sheets.pdf; DOE Docs.pdf

Hi Angela,

Here are some of the more important documents, as they pertain to radiation, from the 2010 Berger report prepared for NYCDDC. I think this report does a good job of outlining the extensive contamination in the area, including the sewers. I also included some of the NYCDOHMH fact sheets stating that there is not an immediate radiological threat to those people working in the area and some DOE documents. Enjoy the reading!

Also, I wanted to invite you and Mel to the site for a brief visit to show you what work has been completed by Eric and I for the removal activities and show you what is planned for the interim shielding on the interior spaces and sidewalk. To complete this last portion of work we would need an estimated \$1 million. Please bear in mind that the Action Memo has not been submitted for concurrence yet so this figure may be adjusted somewhat. Eric and I are both available on M, W, or Th next week to give you guys a tour. M or W work best (in the AM, say 1030 – 1100 hrs). Plan on an hour or so for the tour. I think you will be able to appreciate things a little better if you come out and see it first hand, or since you were involved years ago this may simply be a *refresher visit*. Let us know as soon as you can what day and time works best.

Lastly, please remind Adela NYSDOH, that we are still waiting on the list of other rad sites that they promised on the Video conf call last week.

If you need additional info, please let myself or Eric know. Talk to you later!
